

MORE HI-TECH HEALTH CARE FOR KATONAH RESIDENTS

Westchester Health Associates Creates state-of-the art facility; Small feel, compassionate care in new Katonah office

Katonah, NY (January 22, 2008) Westchester Health, the first completely new multi-specialty medical group completely formed and founded in Katonah in over 30 years, has found a new home in the renovated, former Coldwell Banker building at the intersection of routes 22 and 35. The docs have completely transformed the one-time real estate office into a brand new hi-tech, multi-specialty office with a completely new interior, multiple exam rooms, x-ray capabilities, endoscopy suite and full-service medical care. The Katonah office offers nine different specialties including internal medicine, cardiology, endocrinology, gastroenterology, general surgery, obstetrics/gynecology, adolescent gynecology, orthopaedics, podiatry, and urology.

The physicians of Westchester Health have been practicing in Northern Westchester for over thirty years. Area residents probably know their names or are current patients at their other offices. However, they many not know that they now have a Katonah office.

Over 60 physicians in Northern Westchester, with offices from Brewster, through Bedford and down to White Plains, merged their practices under the Westchester Health name in order to combine resources that will allow them to continue to provide state-of-the-art care. However, the changes are virtually invisible to patients because each physician is still practicing out of their current office, in addition to those who are in the new Katonah office. Appointment times are filling quickly in the new Katonah office as people are figuring out that some physicians, who have long waiting times for new patients in their other office, can fit new patients into their new Katonah office much quicker; due to newly expanded office hours dedicated solely to the Katonah location.

Westchester Health is the area's first physician group that offers patients all the benefits of a large, multi-specialty group such as access to the latest technology and electronic medical records but keeps all the advantages of a small physician's office such as confidentiality, compassion and familiarity.

Is your doctor in the new Westchester Health Katonah office?
