PLANTAR WART TREATMENT

STEP ONE:

In the morning, apply **Compound W** to the wart.

At night time, apply the Compound W & cover the wart with duct tape.

Repeat these steps until two days before your visit.

STOP applying the Compound W two days prior to your visit

STEP TWO:

Apply **Mediplast** (40% Salicylic Acid) to the wart for 48 hours straight before your next appointment.

If possible, leave the Mediplast on the area until the time of the appointment.
